

News release from Vestas-American Wind Technology

Portland, August 14 2023

Vestas secures 140 MW order from Capital Power in Canada

Vestas has received a 140 MW order to power the Halkirk II wind project owned by Capital Power in Alberta, Canada. The order consists of 31 V150-4.5 MW wind turbines.

The order includes supply, delivery, and commissioning of the turbines, as well as a 10-year Active Output Management 5000 (AOM 5000) service agreement, designed to ensure optimised performance of the asset.

“We’re thrilled to partner again with Capital Power to expand their wind energy portfolios in Canada, particularly with one of the industry’s highest producing onshore wind turbines,” said Laura Beane, President of Vestas North America. *“The 4 MW platform is ideally suited for Alberta’s wind environment and our strong service operations will ensure Capital Power’s projects operate at full capacity.”*

“We’re excited to once again partner with Vestas for the supply of wind turbine technology for our Halkirk II Wind project, another critical facet of our balanced approach to net zero by 2045,” said Steve Owens, Senior Vice President, Construction and Engineering for Capital Power. *“The V150-4.5 MW wind turbines will bring our Halkirk II Wind project to life as we continue to power a sustainable future for people and planet.”*

Turbine delivery begins in the summer of 2024 with commissioning scheduled for the end 2024.

About Vestas

Vestas is the energy industry’s global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 170 GW of wind turbines in 88 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 149 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas’ more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
