

News release from Vestas-American Wind Technology

Portland, 29 December 2023

Vestas secures order for 135 MW project in the USA developed by Steelhead Americas, company's North American development arm

Vestas has received a 135 MW order to power an undisclosed wind project in the USA. The order consists of 30 V163-4.5 MW turbines, Vestas' newest high-capacity factor turbine and the project has been developed by Steelhead Americas, Vestas' North American development arm.

The order includes supply, delivery, and commissioning of the turbines, as well as a 20-year Active Output Management 5000 (AOM 5000) service agreement, designed to ensure optimised performance of the asset.

Highlighting its increased focus on project development in key markets, Steelhead Americas led all development efforts including permitting, land acquisition, and construction design to deliver the customer a project that is ready for construction and installation.

Turbine delivery begins in third quarter of 2024 with commissioning scheduled for 2025.

About Vestas

Vestas is the energy industry's global partner on sustainable energy solutions. We design, manufacture, install, and service onshore and offshore wind turbines across the globe, and with more than 173 GW of wind turbines in 88 countries, we have installed more wind power than anyone else. Through our industry-leading smart data capabilities and unparalleled more than 151 GW of wind turbines under service, we use data to interpret, forecast, and exploit wind resources and deliver best-in-class wind power solutions. Together with our customers, Vestas' more than 29,000 employees are bringing the world sustainable energy solutions to power a bright future.
